A Scholar's Dilemma

Dr. Adams was a respected **(1)** _____ in the field of ancient linguistics. To get his current position, he had to present not just his doctoral **(2)** _____, but also proof of additional **(3)** _____ in archival research. His main task was to determine if a newly discovered scroll was written by people who were **(4)** _____, or if it was from a later period when the population was largely **(5)** _____.

He worked tirelessly, but his methods were unconventional. The university committee had to **(6)** _____ his research grant. After a long discussion, they finally gave their **(7)** _____, but with one strict condition: he must **(8)** _____ all safety protocols in the lab. Dr. Adams, however, was known to sometimes **(9)** _____ minor rules if he thought they slowed him down.

One day, his assistant saw him mishandling a fragile manuscript. The assistant's silent **(10)** _____ was evident from her frown. When Dr. Adams noticed, he simply said, "I know you **(11)** _____ of my methods, but trust me, I know what I'm doing." Her **(12)** _____ was total; she believed his actions could damage history itself.

The tension in the lab grew. Would the committee's initial **(13)** _____ turn into **(14)** _____ if they found out? Everything depended on the results of his analysis.
